EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Claims 1-5 and 9 are cancelled by the examiner as not reading on the elected group.

2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a screw nut having a through hole for accommodating a deflector piece, the through hole having a rim positioned on the inner circumference of the spindle nut, the rim having a convex rounding comprising material of the spindle nut drawn from radially inside to radially outside the spindle nut. It was known provide the claimed convex rounding at a through hole of a nut (see cited references), however the prior art does not teach the convex rounding comprising material of the spindle nut drawn from radially inside to radially outside the spindle nut. Accordingly, the prior art does not teach the manufacturing operation of forming the through hole by pressing material from radially inside the nut to radially outside the nut so as to produce the claimed material flow. Claims 6 and 7 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
